Education Catalogue

" In today's dynamic educational environment, classrooms that are not only flexible but also technologically sophisticated are playing a crucial role. It's essential for these spaces to support various learning approaches, accommodating both in-person and online students.

A key aspect is freeing the Teacher's laptop from the screen, making teaching more effortless and interactive. This allows educators to facilitate a seamless and engaging learning experience, fostering greater collaboration and creativity.
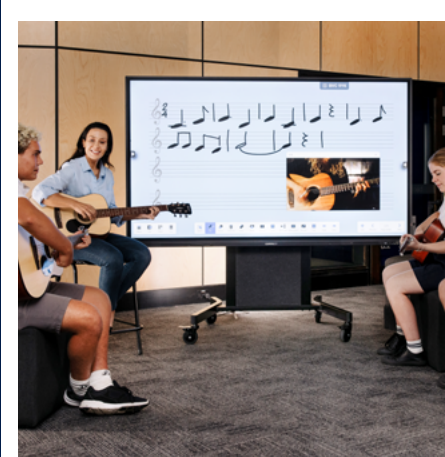

Teaching students to collaborate with AI, so that they can engage in higher order thinking will enable them to thrive in their journey outside of school. Excelling in creating these advanced, teacher-friendly spaces is a pathway to educational excellence. "

ABOUT US

Since its establishment in 1976, CommBox has been a leader in technology innovation for over 45 years. As an Australian company, CommBox designs and manufactures a diverse range of products, including interactive displays, commercial displays, educational apps, designer AV furniture, digital signage, and device management software. These products are not only approved for Defence but are also trusted by various education departments, government organisations, and businesses.

At the core of the CommBox philosophy is a commitment to human-centric technology. This commitment is embodied in the CommBox Crew, a group of end-users from around the world, representing various industries and technical abilities. This group plays a critical role in product development, ensuring that all CommBox products are informed, validated, and tested by real users before their launch.

In its quest for excellence, CommBox collaborates with leading global education technology partners including Microsoft Education, Google Education, ClickView, ViVi, Logitech, Poly, Zoom and others. This ensures that every CommBox product integrates seamlessly into any learning environment, delivering a consistent and reliable experience each time it's used.

CommBox is dedicated to impressing its customers at every turn. This commitment is evident in our cool, modern design aesthetic, superior installation experience, and the ongoing support provided by the CommBox Customer Success Team. Designed with collaboration in mind, CommBox products help educators achieve more together than they could individually. In any space where people come together to learn, CommBox offers an unrivalled teaching and learning suite for teaching, connecting, sharing, presenting, ideating, collaborating, and communicating.

INTRODUCING
COMMBOX LED

WHY CHOOSE COMMBOX LED?

- **Versatility:** An extensive range of premium LED products suitable for school application.

- **Minimal Maintenance:** We pre-assemble and wire each column of cabinets in the factory, simplifying and speeding up installation. Each LED is calibrated in our factory for optimal image and colour reproduction. A front access tool is provided for effortless swap-outs.

- **Energy Efficiency:** The CommBox LED Board is energy-efficient, leading to lower operating costs. This makes it a more cost-effective and better long-term investment.

- **Premium Support:** At CommBox, we understand that investing in LED is significant. Choosing CommBox LED ensures peace of mind. All CommBox LED boards come with a full onsite warranty, backed by our superior and responsive Customer Support.

"The time for LED in the school is now. The need has always been there, because to see facial expressions and read body language, we need size and real estate. The issue in the past was its cost-prohibitive nature, but this has changed."

Nicholas Hall - CommBox CEO

Compatible with 65" screens and above

COMMBOX **ANDROID BOX**

SCAN OR CLICK

Add Google Workspace to any CommBox screen with CommBox Android Box. Powered by Android 13, and certified by Google, experience the Google Playstore, Youtube, Google Apps like Sheets and Docs natively on the interactive screen.

COMMBOX **SENSOR**

SCAN OR CLICK

The CommBox Sensor box enhances the functionality of CommBox interactive screens by seamlessly integrating NFC (Near Field Communication) support into CommBox OS. Quick tap on and off the screen for instant access to a personalised home screen, sidebar, and cloud storage (OneDrive or Google Drive).

Use the Environment App for monitoring room environmental indicators (temperature, humidity, particles, and CO_2).

Available for CommBox S4 & S4+

COMMBOX **SOUNDBAR**

SCAN OR CLICK
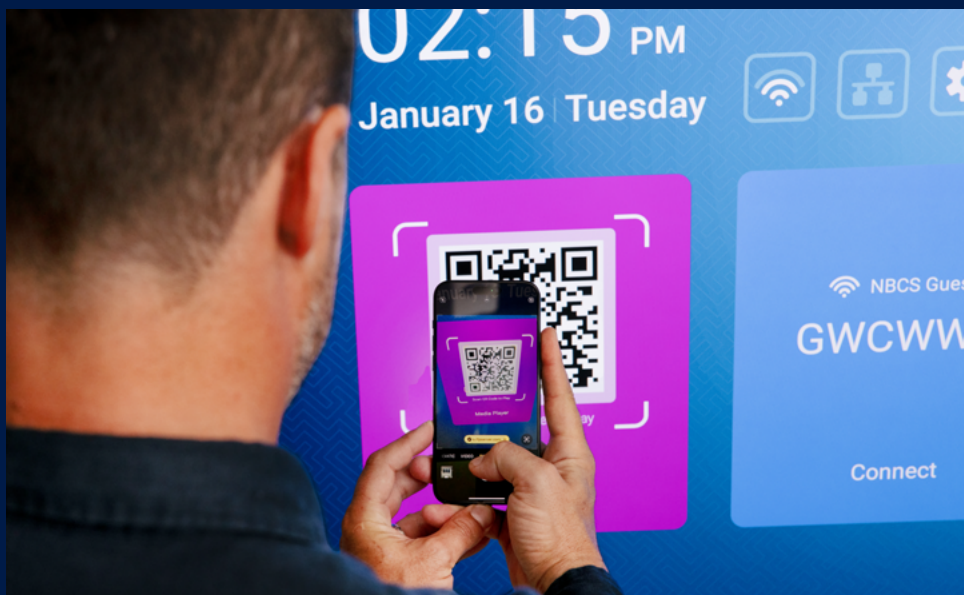

This active soundbar with high-fidelity audio is the ideal audio accessory for both interactive and display screens.

Reinforced by Maxx Bass Technology, you can control volume, input, and power directly from the screen via the 3.5mm port on the rear of the soundbar.

FREE YOUR LAPTOP *with* COMMBOX CLASSIC S4 & S4+

Teaching is now easier, more engaging, and effective with the CommBox Classic S4. One of our primary goals is to free the Teacher's laptop from being connected to the interactive screen all day. This allows the laptop to be used for other important activities and prevents the battery from running out.

To achieve this, we introduced a significant feature called CommBox Accounts. This feature allows Teacher's to log into the CommBox Classic S4 or S4+ and automatically link to their Microsoft OneDrive or Google Drive. Once logged in, Teacher's have direct access to all their saved content right on the screen. They can easily open and interact with documents like PowerPoints or PDFs directly on the whiteboard, eliminating the need for screen sharing and freeing the Teacher's laptop.

Another important feature we've added is the integration of teaching and learning content directly on the screen via CommBox Tools. Teacher's can easily install a variety of educational apps from the CommBox Store, making lessons interactive and enjoyable for students. With the CommBox Classic S4 and S4+, teaching has never been easier.

AI *and* CYBER SECURITY

CommBox is prepared for the future of education, with AI-based functions in the CommBox Whiteboard that improve and customize learning experiences. Access AI based applications on your screen from the CommBox Store or use Microsoft Copilot and Google Bard directly in the CommBox Classic S4 and S4+.
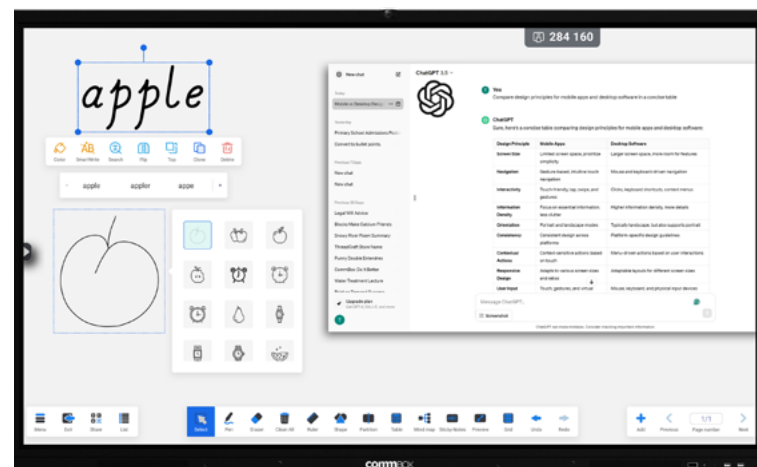

CommBox considers Cyber Security very important, and has opted to take a strong security posture. CommBox has applied CIS (Centre for Internet Security Controls) across the organisation, is a member of Auscert (Cyber Emergency Response Team) and OWASP. All CommBox Team members complete Cyber Security Training and the engineering team all code following the secure development practices required by OWASP Top 10. CommBox OS will be CASA Tier 3 Certified and has passed extensive penetration testing for the CommBox Classic S4 and S4+ devices and CommBox OS infrastructure.

We regularly scan for vulnerabilities within our organisation and applications, and push updates to our cloud infrastructure within hours. We have comprehensive Information Security and Cyber Security Policies, Cyber Incident Response Plans and Business Continuity Plans that can be shared with CommBox customers.

If you want to know more about what CommBox is doing to protect your data, contact our Cyber Security team.
