

Get the most out of your Google investment with SMART

Leverage the full power of your Google education solutions with SMART's customized development of interactive hardware and software.

Only **SMART Board® displays** provide an unmatched interactive experience developed specifically for **Chrome OS™** for intuitive ease-of-use.

SMART Learning Suite empowers teachers to create, deliver and share interactive lessons using the **G Suite for Education™** workflows they already know.

Discover the difference
smarttech.com/demo

Google for Education Partner

Engage students. Empower teachers.

Supercharge your Google devices with SMART Learning Suite, the all-in-one software for educators with:

Engaging lesson delivery

Seize the power to transform the same old static content (Google Slides, Docs, PDFs and more) into dynamic learning experiences.

Untethered teaching

Experience limitless creativity and freedom to take facilitating beyond the front of the classroom. From 1:1 devices to group learning stations – software that follows for uninterrupted flow.

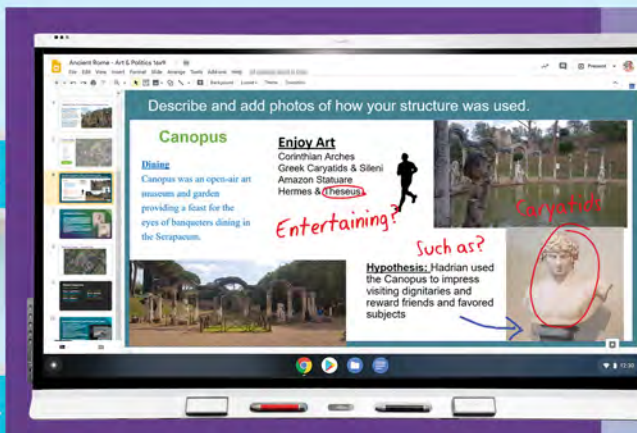

Social Emotional Learning

Connect students through devices in collaborative, cloud-based spaces – for critical thinking and true communication.

Personalized learning

Gain insight into individual student understanding through formative assessments with handouts, game-based activities and more.

**YOUR CHROME DEVICE.
YOUR APPS.
YOUR SMART BOARD.**

Access your Google Play Apps right at your SMART Board

- Interact with the board intuitively: pens automatically write, fingers move and manipulate objects, and erasers or palms erase
- Quickly switch the display to a connected Chrome OS device to access all your Google documents
- Freeze frame any content, write notes and save a screenshot to the iQ whiteboard
- Students can easily share their screen to the display using native Chromecast

**SUPPORT
STUDENT-CENTERED,
PROJECT-BASED
LEARNING.**

SUITE. SUITE. LOVE!

Launch SMART Learning Suite Online directly from Google Drive

- Use Google Slides, Docs, Sheets, PDFs and more!
- Add collaborative, game-based and assessment activities to any lesson
- Create lessons on any web-enabled device, anywhere
- Easily share lessons through Google Classroom for self-paced learning – in class or at home

**ENGAGE STUDENTS
WITH ACTIVITIES
ON THEIR DEVICES.**

And now for the nitty gritty details...

SMART Learning Suite empowers teachers to use the **G Suite for Education™** workflows they already know.

- Centrally deploy SMART Learning Suite Online to all teachers with the G Suite Marketplace app
- Transform G Suite files into interactive lessons – Google Slides, Docs, Sheets, PDFs and more
- Use Google Drive to access and organize your SMART Learning Suite lesson files
- Teachers can easily share Google Classroom lessons with students and colleagues
- Reduce training with no additional workflows for teachers to learn

SMART Board® displays provide an unmatched interactive experience developed specifically for **Chrome OS™**.

- Superior interaction with Chrome OS devices – Chromebook™, Chromebox™ and Pixelbook™
- Intuitive tools including automatic pen recognition, plus palm, pen and eraser differentiation in supported Chrome OS applications
- Multi-touch and single-touch gestures
- 10 simultaneous touch points
- Access the Google Play Store and your apps – right at the SMART Board

Powered by HyPr Touch™ – only with SMART Board

SMART's new, enhanced compatibility with Chrome OS is made possible through iterative over-the-air updates and continual improvements in touch and inking through exclusive HyPr Touch technology. Available across the full lineup of revolutionary new interactive displays.

No Chromebook? No problem.

The **SMART Chromebox G3** enables teachers to access the Google Play Store and their apps directly at the display without needing to connect a computer.
