## Engage Every Student

---

Share any application on your device.  
Instantly and in real time.

# Vivi makes learning more personalised and interactive than ever before

Teaching practices have come a long way in recent years. Students are now more active participants in the classroom. Lessons are becoming more personalised. And teachers are promoting more fluid and collaborative learning environments.

With more and more schools embracing mobile technology, we are well and truly entering a new era of one-on-one digital engagement.

Introducing Vivi.

## What is Vivi?

Vivi is a wireless presentation tool that enables teachers and students to share, display, annotate, capture and save information in real time. From any application and any device in the classroom.

Built exclusively for the education sector, Vivi allows today's tech-savvy students to access learning content effortlessly, engage more actively and collaborate more effectively.

# The powerful features of Vivi

## Freedom to move and work

Vivi is a wireless tool that teachers can operate from anywhere in the classroom. With the freedom to move around while they work, teachers can deliver flexible and individualised learning experiences.

## Effortless to use

The moment teachers and students walk into a Vivi-enabled room with their device, they automatically join in and collaborate. Teachers will pick it up in a flash. And as for students? Well, we'd be surprised if they'd need any training at all! One tap is all it takes.

## Displays and captures anything

Vivi allows teachers to display whatever content they want, from any device they want, when they want. They can display websites, exercises and presentations from anywhere in the room. They can broadcast webpages to all devices simultaneously. And they can allow individual students to share their work and ideas for all to see.

Students can also capture any content shown on the main display. They can then annotate their own notes and save to their devices.

## Seamless technology

With many schools introducing a 'bring your own device' policy, Vivi does not discriminate.

Vivi works seamlessly across all platforms, operating systems and devices. Teachers and students simply download the Vivi App to their laptop, tablet or smartphone – and then instantly participate.

“Even though the classroom model is moving from a teacher-centred classroom to a flexible learning environment, current technology still restricts teachers to the front of the classroom. But Vivi is now challenging this dilemma. The ability to transform any space instantly into a creative and interactive environment is a game-changer. Vivi is simple, intuitive and powerful and I am confident that it will soon help become an indispensable tool for every Australian classroom”

Mark Sullivan  
Director of Innovative Technologies  
Pymble Ladies' College

# Upcoming Features

There is a lot to look forward to with Vivi.

With regular teacher and student feedback, we are continuing to develop and enhance the Vivi feature set.

Here's a taste of upcoming Vivi features.

## Student Engagement Level (Sel)

Imagine if students could let their teachers know they don't understand a key concept as it is being taught? Now imagine they could communicate their uncertainty without having to raise their hand? Soon, Vivi will enable students to discreetly alert teachers if something is unclear – allowing teachers to track individual student engagement in real time.

## Broadcast Emergencies

If your school or institution faces any kind of emergency, Vivi can alert everyone at once. Every Vivi-connected device and screen will display whatever message you choose – such as evacuation or lock-down procedures – in an instant.

## Active Directory Integration

IT Managers will appreciate that integrating Vivi directly with Active Directory will provide centralised and seamless access management for all Vivi-enabled screens and projectors in their school or institution.

## Vivi FAQs

### How simple is it to maintain Vivi?

Very. As a teacher or student, you have little to do other than open the client on your own device and connect to the room. If you're the school's IT administrator, you can connect to the Vivi Admin Portal - a web based system for effortlessly administering your Vivi environment. The portal allows you to:

- Manage user and assigned user privileges
- Manage room names for the Vivi units
- Remotely reboot Vivi units
- Remotely perform bulk updates to Vivi units
- Monitor system status in real-time

### Can I have multiple Vivi boxes in the same learning space?

Yes! When launching the Vivi App, teachers and students will be prompted to confirm which learning space they are using.

### Is it difficult to install Vivi?

Not at all. There are only 3 basic connections on the Vivi unit. Firstly power, followed by the network connection and finally HDMI to the projector or screen in the room.

### Can students take control of the main display without permission?

Students will not be able to wirelessly present unless the teacher gives them permission.

### How do students annotate on the teacher's content?

Any content that the teacher wirelessly presents to the main display, a student can simply push the 'Capture' button on the Vivi app. This will grab a copy on the student's device on which they can annotate their own notes and save for later review.

### How do I get Vivi?

Vivi is available for purchase through a network of resellers listed on the website.

Vivi's pricing structure is comprised of a once off hardware fee plus an annual licencing fee.

Pricing is based on the number of rooms where Vivi is installed.

The Vivi annual licence fee includes:

- Comprehensive technical support
- Service level agreement for ongoing support
- Firmware updates on the release of new operating systems
- Free access to upcoming features as future version of Vivi are released

To make Vivi accessible to all schools, flexible pricing and leasing finance packages are available.
